## About eRaksha Awards

---

CyberPeace Foundation (CPF) in collaboration with NCERT, NCPCR and NCRB had organised eRaksha Competition 2020, with the aim to encourage children & youth to be safe, smart and responsible Digital Citizens, aware about their digital rights and responsibilities. The competition which was open for students and teachers from schools and colleges and also parents and caregivers; got an overwhelming response with over 50,000 entries across all states of India. Participants had developed posters, paintings, videos, blogs to share their understanding and perspective of Digital Citizenship and Online Safety. This compendium showcases the winning entries in all the categories.

## eRaksha Competitions

Participants were encouraged to research, reflect and respond to the essential question of 'what online safety and digital citizenship means to them?', and share their ideas through creatives in the following formats :

- a. Word hack (articles, stories, blogs, essays)
- b. Artcade (painting, poster, sticker, sketch)
- c. Videos/Short Films sharing key messages
- d. Tech Avishkar (prototype of software applications)
- e. CyberPeace Honors

The entries submitted were very innovative and thought provoking and could serve as exemplars for the youth to emulate and become model digital citizens, following the safety norms in the cyber world.

## About the Competition

---

The participants submitted creatives in the form of Posters, Painting and Stickers showcasing their understanding of Online Safety & Digital Citizenship. Various topics that that were addressed in the creatives related to cyber safety and wellness issues, with focus on privacy, safety, trolling, security tips, online fraud, bullying, phishing, malware etc. These engaging and informative creatives will be available on the Cyber Peace Online Platform as well as the NROER Portal of NCERT, serving as guidelines for Safe Online Practices.

## About the Competition

---

The participants shared their understanding and guidelines regarding Online Safety & Digital Citizenship through Essays, Blogs, Articles and Research papers developed by them. The essays on topics like 'Internet – a Friend or Foe?', 'Cyber Security', 'Phishing-a Major Crime', were insightful and thought provoking. The Research papers submitted were well researched, with dealing with the current issues faced by children and youth in the online world. Online Safety tips were comprehensive with clear messages regarding safe and responsible use of Internet.

E- RAKSHA (WORD HACK PAGES :1 TO 5)

Living our digital lives at our own terms,  
and 5<sup>th</sup> Generation War fare

**ARTICLE BY  
MRS. YAMINI AKINCHAN, PGT ENGLISH,  
JNV RANCHI, JHARKHAND**

Humanity is riding waves of progress and prosperity thanks to the tremendous innovations in all spheres of lives with the use of technology. Banking, education, healthcare, commerce and even socializing are scaling to new heights thanks to digitization. So while we are tethered to earth as physical beings, we are also plugged into the digital world, the internet, in the form our digital avatars. Our digital identities are not limited to our Facebook, Instagram and WhatsApp profiles. We have a digital persona at our banks, we have a digital persona at our preferred healthcare providers, we have a digital persona on our favourite e-commerce platform. We even have a digital persona on our online dating services like Tinder and Bumble. And unbeknownst to many of us, they are inexorably interlinked - they come together as our digital avatar. Us, You, Me.

## About the Competition

---

Participants developed original, engaging and informative videos, documentaries, and short films, with the vision to build awareness and encourage responsible and resilient behavior in the Online World. These impressive and professional videos, which made use of very basic technology devices, showcased the knowledge, understanding and creativity of the young developers. Diverse but contemporary and critical issues like Hacking, Online Scamming, QR Codes, Financial Transactions, Privacy on Social Media etc were addressed, sending positive and clear message about the safe and responsible practices on the Internet.

## About the Competition

---

The participants developed innovative software applications and solutions to address the safety and security issues in the Online World. Some of the solutions included 'Anti-Cyber-Bullying VR Filter', 'Redressal of Cyber Crimes - ensuring the privacy through Stay Anonymous Feature', CYBERKAVACH – an application for spreading awareness etc. The creative ideas were original, sustainable and implementable, showcasing the sense of responsibility and technical expertise of the developer in addressing the issues faced by children and youth in the online space.
